

Ecotile interlocking floor tiles provide a functional, practical flooring solution for schools and colleges. Available in a wide range of colours (including primary colours)

The Challenge

Schools and colleges all over the world use Ecotile because they require a durable and smart looking floor that will stand the test of time and meet safety requirements. Schools and classrooms are busy environments and require a floor that is easy to maintain and looks great all year round. Facilities managers should consider:

- **Durability** – Can the floor withstand heavy foot traffic?
- **Environment** – Will children playing damage the floor?
- **Appearance** – Does the floor look smart and presentable?
- **Safety** – Fire retardant, slip resistant and anti-fatigue properties.
- **Practical** – Is the floor multi-purpose? (ideal for events/sports)
- **Maintenance** – How do you maintain the floor and how often?
- **Spillages** – Is the floor chemical resistant?
- **Asbestos Flooring** – Old build schools can contain asbestos.

The Solution

Ecotile manufacture heavy duty floor tiles designed to cope with demanding school environments. Our interlocking tile range is capable of withstanding heavy foot-fall and

Ecotile has low VOC emissions, is fully recyclable and simple to install. Tile and sheet format flooring installed pre-1986 may contain asbestos and should not be disturbed but covered instead. Ecotile is ideal for such applications.

Choose from a wide variety of colours, create patterns and incorporate **logos** into the floor.

Our Clients Include:

UNIVERSITY OF
BIRMINGHAM

UNIVERSITY OF
Southampton

Ecotile can be installed quickly over any hard surface. Simply tap the tiles together to create a safe and functional school floor.
