

Mezzanine floors are infamously difficult to cover, bonding any surface is tough and wooden mezzanines can get extremely dusty.

The Challenge

Mezzanine floors are becoming increasingly popular solution for businesses that want to increase workspace. When specifying a floor covering for a Mezzanine there are several factors to consider such as:

- **Durability** – Can the floor withstand heavy-duty usage
- **Ease of Install** – How easy is it to install the floor considering the location of the Mezzanine?
- **Fire Rating** – Complying with building regulations.
- **Noise** – Is sound absorption a factor?
- **Safety** – Slip resistant and anti-fatigue properties.
- **Versatility** – Coloured walkways and in-floor safety signs.
- **Maintenance** – How often will you need to clean/repair the floor?
- **Aesthetics** – Will the floor look smart and presentable?
- **Spillages** – Is the floor chemical resistant?

The Solution

Ecotile manufacture heavy duty floor tiles suitable for mezzanine floors. The tiles provide a safe work surface that reduces noise, dust and maintenance costs.

Installing Ecotile is very easy – the tiles click together without any need for adhesives or specialist equipment. There's no need for complicated preparation and there's no curing times either, simply install the tiles and start using them immediately.

Choose from a wide variety of colours, create **colour marked areas** and incorporate **logos and safety signs** into the floor.

Our Clients Include:

Ecotile is UK manufactured and has been tested vigorously against strict British and European standards. Contact us to find out more about specific technical data.
